

LongLite™

Energy Efficient Light Control

adding daylight to life

Proudly Australian Made & Owned

LongLite™

Energy Efficient Light Control

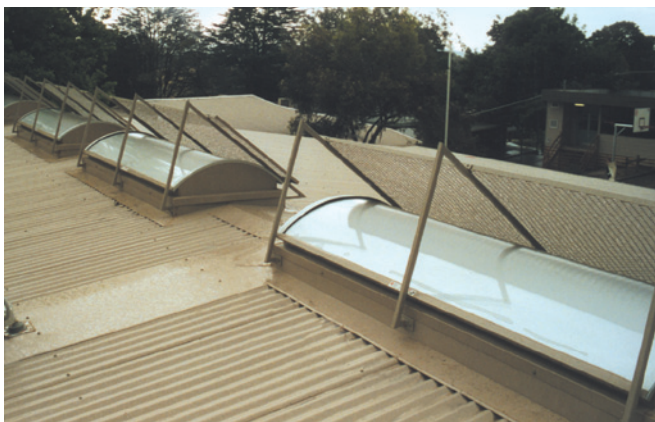

Linear skylights - single module or continuous run

- LongLite™ skylights are suited to stadium and warehouse applications.
- Flexibility of design allows LongLite™ skylights to be used in all roof types, although they are most commonly used in horizontal situations such as ridge lines and deck roofs.
- Low maintenance, anti-condensation design makes LongLite™ completely weather proof.
- Available as double glazed (for improved insulation) or single glazed units, depending on project requirements.
- LongLite™ features an Aluminium Glazing bar system at each end for increased strength to ensure glazing sheets remain fixed in place under high wind conditions.
- Most commonly used glazing are standard Acrylic, high impact Acrylic and Polycarbonates.
- When glazing is fixed there is no penetration of glazing, allowing unrestricted thermal movement.
- LongLite™ is also available in a continuous form using an Aluminium Structural glazing bar, eliminating bulk heads between the LongLites.
- Suitable for all roof types and roof pitches.
- Available in Colorbond®, Zinalume® and galvanized finishes.

LongLite™ Standard Size Chart*

size (mm)	actual throat size (sq.m)	ventilation area (sq.m)
1200 X 500	0.6	0.095
1200 X 600	0.72	0.095
1200 X 800	0.96	0.095
1200 X 1000	1.2	0.095
1200 X 1200	1.44	0.095
2400 X 500	1.2	0.19
2400 X 600	1.44	0.19
2400 X 800	1.92	0.19
2400 X 1000	2.4	0.19
2400 X 1200	2.88	0.19
