

SelectoLite™

Energy Efficient Light Control

adding daylight to life

Proudly Australian Made & Owned

SelectoLite™

Energy Efficient Light Control

Diffused Solar Energy and High Light Transmission

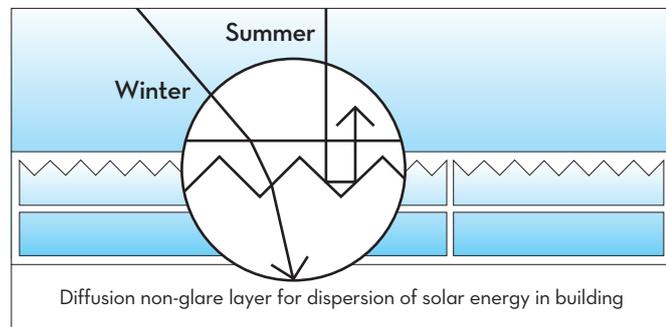

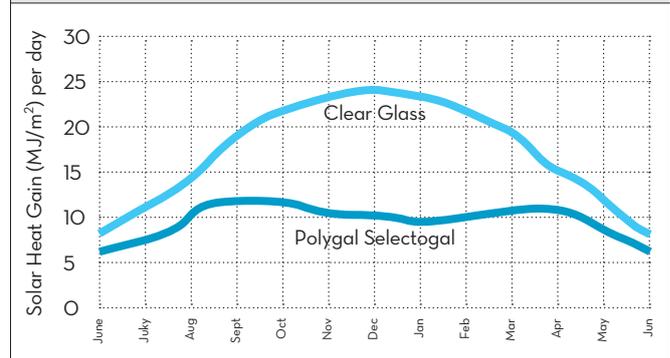

- SelectoLite™ Skylights are ideally suited for hospitals, schools and offices where reduction in solar heat and glare are important.
- SelectoLite™ is a state of the art innovation that offers diffused solar energy and high light transmission all year round.
- The revolutionary SelectoLite™ skylight concept of diffused light transmission uses a unique prismatic 16mm multilayer polycarbonate panel providing the ultimate energy efficient, non glare skylight.
- Clear outer moulded insulating dome gives extra heat reduction.
- In summer, when the sun is at its highest, SelectoLite™ reflects the sun's rays and prevents heat penetration while transmitting indirect natural light into the building.
- In winter, when the sun is at its lowest, SelectoLite™ allows solar energy to penetrate and warm the building.
- SelectoLite™ comes in a standard size range, as per chart, customized sizes are available on request, also available as a circular skylight.
- There are no separate louvre blades to rattle, discolour or rust due to inner flute condensation.
- SelectoLite™ is suitable for all roof types and roof pitches.
- Available in Colorbond®, Zinalume® and galvanised finishes.

SelectoLite™ Standard Size Chart*

size (mm)	actual throat size (sq.m)	ventilation area (sq.m)
500 X 500	0.25	0.081
600 X 600	0.36	0.095
800 X 800	0.64	0.122
900 X 900	0.81	0.136
1000 X 1000	1	0.149
1200 X 1200	1.44	0.176
500 X 800	0.4	0.102
500 X 900	0.45	0.104
500 X 1000	0.5	0.112
600 X 800	0.48	0.108
600 X 1200	0.72	0.136
800 X 1200	0.96	0.149
900 X 1200	1.08	0.156

Daily Solar Heat Gain

Technical Data

Sheet Thickness (A)	16mm (RFX)
Colour	Clear outside, opal non-glaze inside
(U factor ASTM-C236)	2.3W/m ² C
SHGC	0.28
Visible Transmission - TVis	0.191
Thermal Expansion	2.5mm/m

Tested to AS4285-2007 (up to 1500x1500mm)
