

PyraLite™ are pyramidal shaped skylights that provide a stunning aesthetic feature to any rooftop. PyraLites blend the functionality of daylight harvesting with contemporary design.

Belle's roof access hatches provide easy access for general maintenance to plant and equipment. The hatch tops are available in opal and clear domed for light transmission or insulated metal.

Belle Skylights is a proud distributor of VELUX® products, the world market leader in high-quality Roof Windows and Skylights. VELUX® products include manual and electrically operated Skylights and Roof Windows, with blinds to suit, and other accessories.

Solatube® Daylighting Systems empower architects and designers to include sustainable daylighting practices in all their commercial and residential projects. They provide innovative ways to add light to homes, offices, warehouses, closets, bathrooms and any other environment.

# Enjoy more natural light with Belle Skylights

Recommended by major architects, builders and roof installers, Belle Skylights are Melbourne’s leader in quality skylight design and manufacturing. Established in 1964 they are industry leaders in daylight harvesting and the design of energy efficient double glazed skylight products, Belle Skylights can help you to determine the most effective and energy efficient way to add natural light to any environment.

Belle Skylights manufacture and distribute a wide variety of products designed for commercial and residential applications. Our skylights are suitable for all roof types and come in a large range of sizes. They are manufactured locally in our purpose built factory, the largest in Victoria, using only the highest quality materials.

For further information please visit our showroom demonstrating over 90 skylights and displays, or contact us at [info@belleskylights.com.au](mailto:info@belleskylights.com.au)

The EcoLite™ PLUS insulated glass unit (IGU) is a revolutionary second generation double glazed glass skylight which exhibits extremely high light transmission with very low solar heat gain.

SelectoLite™ is a state of the art innovation that offers diffused solar energy and high light transmission all year round. Ideally suited for hospitals, schools and offices where reduction of solar heat and glare are important.

OpalLite and ClearLite provide an economic alternative for domestic and commercial applications.

SunTube skylights are designed for minimal structural alterations in both residential and commercial applications.

FiltaLite provides year round radiant sun and heat control by minimizing radiant heat in summer and maximizing light transmission in winter.

ThermoLite™ provide quality, durability and high light transmission all year round, providing an economic alternative for commercial applications.

CircuLite provides a stunning aesthetic feature to any room, entrance, or landing with all of the environmental and energy saving benefits of natural daylight harvesting.

LongLite™ are linear skylights designed for use as a single module or a continuous run. They are ideally suited to stadium and warehouse applications.
